

Healthy fundraising with Smooze

Smooze is simple.

It's just fruit & coconut milk.

Refreshingly free of small print.

100% absolutely all natural & free of artificial additives.

Unlike other frozen treats our ingredients don't come from a mad scientist's lab. Smooze is simply made with freshly pressed coconut milk, real fruit juices, and fruit purees – not concentrates or reconstituted juices.

We then add natural ingredients like:

- **Fruit Pectin:** a natural dietary fibre found in citrus rind, which makes Smooze creamy. This is what makes the fruit juices & purees gel together with the coconut (it's called stabilizer on the pack)
- **Citric acid:** found in citrus fruits and gives Smooze its fruity tang and acts as a natural preservative
- **Ascorbic acid:** a natural preservative that contains vitamin C
- **Fruit flavours:** all straight from nature
- **Sugar:** Smooze has on average 40% less sugar than other frozen treats

View the purity certificate for Smooze's fruit pectin.

Smooze is:

- 100% free of artificial colours & flavours
- Completely preservative free
- Dairy free
- Gluten free
- Cholesterol free
- GM free
